“ *Much more could be said of my friend Verdie Stewart than would fit in this little box. He was fascinated with physics and the nature of the universe. He was a philosopher, and a great reader, being almost entirely self-educated. I learned more physics from Verdie's explanations than from many books on the subject. As near as I could tell Verdie's faith amounted to an awe inspired humility at creation, and he spoke of God in a similar way as Albert Einstein did. I will always remember the trip we took to transport a "DriveWay" car from Florida to Maine in May of 1974, and the way he reacted to his first lobster "looks like a ... bug!" I cherish the many conversations we had on all kinds of subjects, especially the ones via telephone in the last months of his life. GodSpeed my old friend :(*
